

FSCI 2019

FORCE11 SCHOLARLY COMMUNICATION INSTITUTE

August 5 - 9, 2019
UCLA • LOS ANGELES, CA USA

Scientific and Scholarly Communication is in the middle of a system-wide disruption, affecting every aspect of research, from its practice, to its administration and dissemination, and to its use. There are new forms of publication, new standards and expectations, new ways of measuring and demonstrating success, new dangers and pitfalls.

The Force11 Scholarly Communication Institute at UCLA (FSCI) is a summer school that helps people learn how to navigate this new world. Our instructors include leading practitioners from the world of research, libraries, publishing, and research administration. Our goal is to provide a friendly, community-based way of learning about and moving the needle on the latest trends, technologies, and opportunities that are transforming the way science and scholarship is done.

WHO SHOULD ATTEND?

Courses have been established for all levels, from novice to advanced, designed to appeal to:

- Researchers and Faculty
- Institution Administrators
- Funders
- Publishers
- Librarians
- Students
